#### CONTROLLERS COMMENTS

It was interesting to see how the inclement weather preceeding the event had an adverse effect on some areas but left others relatively unchanged. In general the best routes were through the forest and not along the rides which were mostly heavy going. The decision to confine the shorter courses to the drier southern and proved to be a wise one.

We would like to thank the planners Norman Street and Tom D-Pooley who put in alot of hard work to produce some excellent courses and all of the other members of SOC who helped before, during and after the event making it an enjoyable day.

PLANNER EOD COURSES COMMENTS

Thank you all for coming. I hope you all enjoyed the courses in spite of the ground underfoot. I tried to think what it would have been like if there had been a weeks rain beforehand. We confined Wayfinders to the southern section of the map to use the ride/road network. Further north the forest is more natural but greater "O" skills are needed in it. This is perhaps reflected in that some of the short club courses got thoroughly lost. Finally I must thank the controllers Mike & Chris Tween for their hard work before and during the day.
